Without entering the password if we click on login button then the error message should show and the message shown is called error coverage testing and if it does not show then we should assign developer that the error message is not shown that is also a error

A login form with a pink circular logo containing 'SR' at the top. Below the logo is the text 'DNY867' and a blue link 'Change user'. A password input field is shown with the placeholder text 'Password'. Below the input field, a red error message reads 'Password should be minimum 6 characters.'. At the bottom is an orange 'Login' button and a link 'Forgot user ID or password?'.

SR

DNY867

[Change user](#)

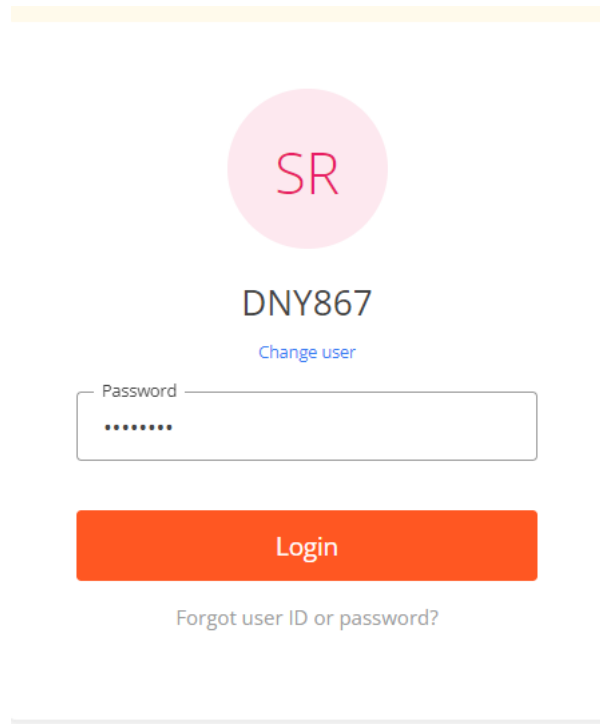

Password

Password should be minimum 6 characters.

Login

[Forgot user ID or password?](#)

The user name which is created is stored in backend and password which we enter is also stored in backend and this stored or not which we check it is called Backend coverage testing

Service Coverage Testing

In this testing the Tester get the Flow process of application from Product owner and he check the process flow is ok as per given below

Calculation Base Coverage Testing

In this testing we check the calculation of application i.e. if we are buying this HDFC Stock and while buying we will see default 1 no. if we make it 10 then the calculation should be change that is it should be multiplied with 10 as shown in next slide
