## FAQs

- Q** What is Manual software testing?

**A** Manual Testing is a popular type of software testing where test cases are executed manually without using any testing tools. Manual Testing demands a lot of effort, but it is more accurate and does require the knowledge of some testing tools.
- Q** Benefits of getting Manual Testing certification?

**A** Certification in Manual Testing is proof of your skills that you are good in performing software testing and hands-on expertise in test case designing and development.  
A certified manual testing expert can explore more job opportunities when compared to average test engineers without certification.
- Q** Can I get a job immediately after completing the course ?

**A** It completely depends on the student contribution toward the learning of new skill. Our trainer will give 100% of their efforts to Upskill , build you confidence and will help with the job guidance. Still, keep in mind that we are an IT Training Company, not a placement agency.
- Q** How does ITLearnner help in job placement after completing Manual testing course?

**A** Our manual software testing course is structured so well that it will help you in converting manual testing learning opportunities to attractive job offers by showcasing your quality assurance skills at the time of interview.  
You can prepare for an interview through assignments and interview questions, and project work given by our instructors. We do provide complete job assistance too like resume building, interview prep, and more. Still, keep in mind that we are an IT Training Company, not a placement agency.
- Q** Does ITLearnner offer discount on group booking ?

**A** Yes, we can offer a discount for group bookings and provide Training for groups. Please contact us for more information.
- Q** What further skill sets I can explore after completing the Software Testing Course at ITLearnner?
