

OOP's in Real Life

Save it
for Later

@sandhya Chauhan

There are 4 **OOP** concepts

- 1 Polymorphism
- 2 Inheritance
- 3 Encapsulation
- 4 Abstraction

1 Polymorphism

Boy can be a student, a player, and a writer. So that this boy can exist in **different ways in different situations.**

2 Inheritance

All vehicles are not the same. We can inherit common properties like color, size, type from the parent vehicle class and create classes like Car, Bus, Bike.

3 Encapsulation

The most commonly used example is the medical capsule. **This capsule mixes few types of medicines and stored in one capsule.**

4 Abstraction

On a mobile phone, we can perform so many actions but here also we **don't know the inside process** of these things. implementation parts are hidden.
