Using Git Bash in VS Code

- Open **Terminal** → New Terminal.
- Select terminal dropdown → choose **Git Bash**.
- You should now see a Bash prompt (\$)

Set Git Bash as Default in VS Code

- Open **Command Palette** → "Select Default Profile".
- Choose **Git Bash**.
- Open a new terminal → it will **default** to Git Bash.

Git Bash gives Windows users a **Unix-style** terminal useful for **development** and **Git operations**.
