Overview

One of the key pieces of our web experience is the *Account Page*. The *Account Page* is where users will checkout once they have added items to their cart through a social media flow, such as Facebook.

Project

For this project, we'd like you to automate:
1. Create a new email account here
   https://qatest.commentsoldrt.com/webstore-register?destination=/account
2. Purchase an item using a credit card.
3. Logout
4. Log back in here: https://qatest.commentsoldrt.com/webstore-login?destination=/account
5. Purchase an item using using a credit card and coupon.
6. Logout

Task

➔ Write the automation using tools you know well
➔ Use best practices for writing the automation code
➔ Submit your code when complete
➔ Prepare to do a walkthrough of your automation code and demo it running
➔ Capture any bugs, issues, or inconsistencies
➔ Capture any questions about the page that are relevant or unclear

When you have completed and returned the project, we will set up a call with you to walk us through your approach and review any bugs, issues, inconsistencies, or questions you have captured.

> **If you run into any problems, please don't hesitate to let us know!**
> **This is a test environment so there is always a small chance of some minor issues.**
> **You can email heather@commentsold.com.**

Account Page

Login page for social media users

https://qatest.commentsoldrt.com/login

Register

Create a new account with an email address:

https://qatest.commentsoldrt.com/webstore-register?destination=/account

Login

Login to the *Account Page* with an email address:

https://qatest.commentsoldrt.com/webstore-login?destination=/account

Payment Methods

Credit Card

➔ **CC Number:** 4242 4242 4242 4242
